IAM CORE USER GUIDE

Maria Paula Anastás

As a user there are several operations that can be achieved in this application. The main methods of the system are: create, delete, modify and search in the users and identities.

CREATE

To create a new user the next screen will appear

In this field the user must

1. Write a username in the indicated field.
2. Write a password in the field.

After writing in both fields the user has the option to either Sign In or Register.

SIGN IN

If the user clicks on the Sign In button the application will validate and authenticate the entry, after this the Create a new identity window will appear.

REGISTER

If the user decides to click on the register button the next screen will appear:

In this screen the user must fill:

1. a username
2. a password
3. the same password to confirm
4. the display system name
5. a User ID
6. an Email.

All this will be saved into the system for future references (DB).

NEW IDENTITY

If the user is looking to create an identity he must be signed in. After this the following screen will appear:

CREATE NEW IDENTITY

UID

1

Display Name

2

E-mail

3

Create

Manage Identities

In this screen there are three fields required,

1. UID
2. Display Name
3. Email

After filling this the user must choose between Create and Manage Identities.

CREATE IDENTITY

If the user chooses to click on the create button the identity will be saved into the database for future references.

MANAGE IDENITIES

If the user clicks on the Manage Identities button the next procedure will occur. The user must decide between the Search, Edit and Delete operations.

SEARCH

To **search** an identity the following fields will be required:

1. UID
2. Email
3. Display Name

After filling the information mentioned above, the user can click on the search button. Immediately a list of options will appear for the user to see.

DELETE

After this operation, the user can decide to Delete or go back. If he wants to delete an identity he can just select one from the shown list and click on the delete button. After this the selected identity will be deleted.

MODIFY

If what the user wants it is to update an identity, he can choose the identity he wants to modify and then he can fill the next fields:

1. UID
2. Email
3. Display Name

After this by clicking update the changed identity will be saved.
